hello guys is there someone here? exit Hello everyone! hi, how are you? i'm ok i was looking for a program, which will allow me to work with timestamps in irc to be more exact, the program which will allow me to set timezone on my server time and date settings? no... it will be a program like this i have a good idea, how to create it I just need a program, which will allow me to do it I also want to know, if i can do it with bash scripts and will be created Can you do that manually? manually? by hand? i don't know As in manually set timezone I want to know, if there is any chance, that i can do that or, how can i achieve that how to make it manually? can anyone help me? I think you need to find some bash/python/perl script which will set timezone. or maybe even find some perl script to do the same thing for you, but this is, i think, a bit more difficult. perl is the best choice? Probably. :) !perl | o0w o0w: perl is a language created by Larry Wall. The derived Embedding package 'libwww-perl' provides httpd::embed. i think, i will use perl is it correct?
