Download: dialog naskah drama cerita si pitung A: You should add a.zip extension. You can use software like 7-zip or WinRAR to extract the file and put it in a folder. Then, you can add that folder to your repository, and you can sync it to all your devices. The.zip extension can be used to distinguish the file type and is a standard of zip-based archives. For reference, this is how to add a zip file to your repository: Go to the Android Studio menu bar (where it says "Build, Run, etc.") Click the icon with a three horizontal lines. The drop-down menu should be at the top of the menu bar Click on the "Add zip..." button Select the zip file you want to add. Then, click on the "OK" button. That's it. You've added a zip file to your repository.
