Work with real and virtual viewers. Use RTV viewers to quickly share your drawings with stakeholders, customers, and collaborators. Import drawings from Amazon AI and create a viewer in no time. Rapidly and easily create annotative diagrams with Feedback assist. With rich

attributes, every annotation is supported. And with the ability to import rich drawing files, annotations appear on the fly. Rapidly and easily create layout diagrams. Create viewports and arrange components directly in your drawing, without additional drawing steps. Pinch Zoom: Turn drawings into a best-of-both-worlds solution. Draw and edit the same drawings with ease, on the PC or mobile. The new pinch zoom option allows you to zoom in and out of the drawing area, bringing any area you're interested in into view. It's easy to keep track of changes and keep your drawing in sync with your design and design intent. Smart Pins: An auto-pinning feature that removes pins automatically to free up space when a drawing is repositioned on a map. The new,

more intelligent Smart Pins appear based on the drawing as it moves, not where the drawing started. Pin icons, if any, will move automatically to the spot where the drawing is. If a pin icon does not appear, the pin will not be placed. Plus so much more... In addition to the above mentioned new features, we've implemented many new enhancements and bug fixes to AutoCAD, as well as a re-write of the Windows installer.
