KEYMACRO is the ultimate tool for Windows users who are used to powerful keyboard macros. It uses only the keyboard to achieve powerful, useful, and time-saving macros. Once they are configured, you can run them without holding any mouse button. The flexibility of KEYMACRO is endless. There are many ways you can build a complex macro which can save you lots of time. Features: 1. Keystroke Recording and Editing: Each macro can be recorded by pressing a specific key. After you have recorded a macro, you can edit it as needed. There are 2 different ways of editing. When a macro is recorded you can edit the parameters by moving the mouse pointer on to the edit field and pressing left or right button. When a macro is not recorded you can edit the parameters by selecting an edit field and pressing enter. 2. Macro combination: You can combine multiple macros to perform an action once. For example, you can combine a directory-opening macro with a directory browsing macro to move the contents of a directory to a specific location. 3. Macro automation: You can automate any action by using Keystroke automation. For example, after you have recorded a macro which opens a folder, you can set the macro to automatically open the folder after some time has passed. 4. Multitasking: You can open a different window after you have finished a macro or even if you are in the middle of a macro. 5. Automatic screenshot: You can make your macros take a snapshot of the current state of the window. 6. Keyboard Logging: If you are using another program which does not log keyboard activity, you can let KEYMACRO log keystrokes so you can see which keys were pressed to accomplish a macro. 7. Hotkeys: Once you have set up a macro, you can assign a key combination to that macro. 8. Loop-through: You can run a macro once after every x minutes. 9. Auto repeat: You can set the intervals of a keystroke. 10. Shutdown notification: You can easily add a macro to shutdown your computer when a specified time is up. 11. Screen configuration: You can set up macros to act on only a specific window. 12. Timeline: You can create a macro to move to a different window, maximize a window, open a window, or drag a window. 13. CPU accounting: You can add a macro to execute periodically to gather CPU activity statistics. 14. Task 77a5ca646e
