That's not the only thing Republicans are up in arms about: for the last few months, they've been accusing Democrats of "moving the goal posts" on immigration. This time, the GOP plan would not grant illegal immigrants automatic legal status or a path to citizenship. But the new bill does include four measures meant to "protect" Americans from illegal immigrants' driving. The Bush administration has taken a similar tack and issued a memo to US border agents on the same four issues. Not all Republicans are on board, however. While Bush has said that his plan covers the four measures and costs \$25 billion, Rand Paul, a Kentucky senator who's favored by many conservatives, has said it doesn't. "I think we ought to get rid of all people in this country who are illegal," he said. A GOP bill is still possible after Tuesday, the last day to try to iron out differences between the two parties. If the Democrats and Republicans can't come up with a compromise, all 12-plus million unauthorized immigrants will remain an immigration issue that could keep lawmakers up at night through the August recess. Advanced integrated circuits (ICs) include gates that perform rapid switching of electric currents, e.g. transistors, and other high frequency components. Electronic devices including such ICs may utilize voltage mode clocking (VMC) to reduce clock power consumption. In VMC, a clock signal is periodically switched between a positive voltage and a negative voltage according to the data timing of a circuit. Switching of the clock signal from one voltage to the other occurs
