PTC Designer (formerly PTC Creo) is a suite of 3D modeling, manufacturing, and assembly design software, which runs on the Windows platform and supports collaboration among multiple users in an interactive manner. It supports the use of the extensible markup language (XML). CadQuery (also known as ClientQuery) is a toolset for designing and building automation for Computer-Aided Design (CAD). DGNObjects is a component that adds to AutoCAD's object querying capabilities. PDMObjects is a component that adds to Autodesk's Parametric Design product Manager functionality. PTC DirectConnect is a program for controlling parameters and feedbacks in CNC machining. It is designed for the Paraview release 5 CAD system, but it works with any AutoCAD version with a PDM runtime. PTC Creo Web is a server component that provides a web-based application interface to the 3D modeling and 2D design applications in the PTC Creo suite of software. PTC Sketcher is an integrated suite of CAD/CAM, 3D modeling, and 2D drafting tools. PTC Sculpt is a parametric design and product modeling application suite. See also Autodesk Inc. ## What's New in the?

ScratchPad Window: With more ScratchPads on screen, you can work with them simultaneously. (video: 2:14 min.) New CAD-Standard Formats: Convert existing projects to the new AutoCAD-Standard file format for compatibility with native AutoCAD features such as precise shape modeling and advanced robustness. The new file format provides the flexibility to add future AutoCAD features without compromising AutoCAD's compatibility with existing projects. New for AutoCAD, API-based 3D and 2D Viewports: Add 3D and 2D viewports, viewports with a tool palette, and an ability to display many viewports on one screen. New Methods and Events: Add a new control-aware method of selecting objects for assignment to markers, and a new command for setting layer visibility in addition to several new properties and events. New Coordinate Systems: Display true north on the coordinate system palette. New coordinate system in project space. New Input Devices: More precise mouse controls with the new Zoom tool. New ability to select a tool from the tool palette with the Arrow keys, and Drag & Drop functionality. New drawing window commands for controlling viewports and creating new ones. New property dialog options for mapping devices and annotating parts of the screen. (video: 3:18 min.) New Text Tools: Support for the new text tools in AutoCAD. New Web Directions: Web rendering tools are now included in the AutoCAD application. In addition to rendering to files, such as SVG, PNG, GIF, and PDF, HTML5 is supported in all the main web browsers. New Display Features: Shaded Faces and Caps for B-rep faces. Polygon, spline, and parametric box tooltips. Improved Construction Tools: Better ability to control wireframe display. An improved wireframe camera, speed options, and snapping for directed lines. (video: 1:37 min.) New Page Layout and Print Features: The new Page Layout dialog is more customizable and offers an improved layout editor with 3D features. New View Display: Create your own new views or set of views for editing your drawings. New Space Navigator
