
(FSX-P3D-P3Dv2) ORBX FTX GLOBAL VECTOR 1.10 Crack WORK

Dec 13, 2013 installed full version Global Vector.ext. I then did the following from FTX Central Install : Configuration > Forest > FDS > Global > FTX Central > Global > Forest: Settings > CDD > Global > FTX Global > Vector > VN > XBOD
Dec 20, 2013 FTX Central > Forest > FDS > Global > FTX Global > Vector > VN > XBOD
Dec 20, 2013 FTX Central > Forest > FDS > Global > FTX Global > Vector > VN > XBOD
Mar 6, 2013 tried all combinations of settings on option cd/d, can't find a way to make it work. I have also a plug-in FSX_FXE (fr) Ubuntu 12.04 with OpenAL on i7 2.2GHz, Windows 8 and FSX
Mar 7, 2013 have downloaded three times from the net, all different numbers, but all the same - no change. The progress was going well from the beginning. Also tried to install a new VN version.
May 9, 2013 Could you please confirm that you have the XBO version 1.05 installed? In that case I would ask you to install the XBO 3.60 library.
Feb 27, 2013 I downloaded global-vector-1-10-130808 and I installed it on Ubuntu 12.04, and it worked fine.
May 1, 2013 Have you installed the XBO 3.60 library? Try again and if your problem persist a comment.
Mar 4, 2013 Do you have any choice at all in the forest tree library? I can't find the choice anywhere and it crashes my FSX.
Feb 21, 2013 I've just downloaded XBO 3.60 and it works! I know that the original FSX vegetation for FTX cannot be changed but maybe you can install the scenery like an add-on.
Oct 12, 2012 I have tried to change the vegetation, but in vain.
Aug 15, 2012 Which vector system do you have installed? I have the one that comes with FTX Central. I need the original forest.vvect.
Jul 7, 2012 Has it worked? Mine does not seem to work.
May 4, 2012 Installed XBO 3.2, no problem, installed FTX
