Recent Posts on Live A Geek :: watch movies online free with 1080p resolution All this while, we have been only using the newly added video player online on our browser. Tired of using the new video player that came with the addon? We are all set to give you another option. Apart from the new video player, the addon also introduced another new feature for logging you in. Logging you into different websites through the browser. Sites like Facebook, Twitter, Twitch, Netflix, Youtube, Google Play Store, Deezer, etc. can all be logged into through this addon as long as you have the addon installed. You just need to log in to a popular site through your Facebook account and it will automatically log you into that site. This is a very useful feature for travelers. I have been stuck in overseas cities and was having trouble connecting to the wifi in my hostel because of the firewall restrictions. With this addon installed, I can easily log into any site through the browser, no matter where I am. In fact, even I use this addon on my Windows PC because of its benefits. The new video player has a lot of changes. We have a separate chat window that will give you info on the videos that you are streaming. When a user comments on a stream, a notification will appear on the top right corner. If you have any suggestions to improve the addon, do let us know. We will try to improve it as much as we can.
