With the new Times tables quiz, students can now perform multiplication on their smartphones and tablets by simply clicking the button on the screen, without the need to reach their calculators or their computers. This educational application is an ideal tool for students of all ages, as it can allow them to learn times tables by heart and so memorize them. Moreover, users can determine the correct answer by simply clicking on a button that displays the multiplication operation in a voice. In order to perform operations, the user needs to tap on the buttons shown on the screen and a voice will guide them through the process. Upon each operation, students will see a button at the top of the screen, and if it's the correct one, the program will let them know. Ultimate times tables quiz offers a voice guide, that tells students what to do and when to do it; this way, they will not even need to rely on visual

clues, which will enable them to concentrate fully on the task. This app is a fast and easy application to use, as there are no distractions whatsoever. It's possible to save time with Ultimate times tables quiz, as it doesn't require children to memorize the times tables manually, but instead will ask them to simply recite them from memory. This is an ideal way to improve their memory and in turn, their concentration. The application also offers a lot of quizzes to help children remember their times tables. The questions range from basic ones to ones with several answers, so children will have no problem telling apart the correct from the incorrect answers. Parents will love the fact that they can set the time and frequency of the reminders that they want, so they can be certain that their children will perform their exercises on time. In addition

Ultimate times tables quiz is a useful and easy to use application developed as a teaching-aid, that can help young students learn mathematics faster and more successfully than by simply repeating the operations incessantly. Ultimate times tables quiz description Ultimate times tables quiz is an easy to use and intuitive software utility designed as an educational tool for children in the hopes of teaching them how to multiply numbers correctly. The program is sufficiently simple to work with, so kids could even use it unassisted by parents or educators, as it only requires that they click on certain buttons. Ultimate times tables quiz features a multiplication chart that contains numbers from 1 to 12 on vertical and horizontal lines; the point where they intersect displays the correct result of the mathematical operation. When clicking on any of the buttons, a voice will read the multiplication process, for instance '9 times 8 equals 72'. By continuously repeating and playing with Ultimate times tables quiz, children can gradually begin to learn their times tables as a game, without even realizing that they are actually doing maths. This way, it will seem less difficult and they will be able to remember the correct answers better, by associating the operation with an image or a voice, depending on their style of learning in general. Moreover, the program also contains several quizzes that children can take in order to verify their current knowledge. It features multiple choice questions that are meant to help kids tell apart addition from multiplication, for instance. After a sufficient amount of time, it will become instinctual and they will no longer have trouble with it, performing these simple operations on the fly. To conclude
