**Photoshop 2021 (Version 22.3)**

1. **Get a handle on Photoshop's basic tools.** The most common, necessary tools are the Layers window (Ctrl+Alt+L or the main menu's Layers command) and the pencil tool (Command+B). See Chapter 5 for more on using these tools. 2. **Understand the shortcut tools.** As explained in Chapter 5, you can access numerous shortcuts using these tools, including the zoom tool (Option+scrollwheel) and the crop tool (Crop). **Professional keyboard shortcuts** The first line of icons in the Layers window (the default view, as shown in the top of Figure 4-1) control the Photoshop window and some of its functions. The default view is the most common method of working with the Layers and Tools windows. To change the default view to the Compact view, choose Window⇒Workspace. The Compact view removes the menu bars and toolbars from the window. In Windows, the main menu's Layers command has a couple of subcommands to zoom in or out. See the Help menu to see how to access these commands. In Mac OS, you need to use the View⇒Tool Windows⇒Layers menu command. **3. Choose to work with gradients.** If your image or web page background has any shades of gray or color variations that use gradients, you can make them more cohesive by choosing the Gradient overlay from the Overlays panel. You can add more than one gradient overlay, so be creative. As the image in Figure 4-1 shows, I added two. I selected the top-most layer in the Layers window and used the Gradient Overlay dialog box to choose the linear gradient shown. When you choose a gradient, the Gradient Overlays panel opens, where you can find more options. 4. **Use the Clone Stamp tool.** The Clone Stamp tool enables you to not only remove unwanted parts of an image, but add to the part you want to keep. This tool shows up in the bottom-left corner of the Layers window. Choose a color for the clone and a blending mode; you can also choose from a number of different brush sizes, shapes, and hardness. Figure 4-2 shows the options for the clone tool. **\***

Serum testosterone and luteinizing hormone levels in normotensive ageing men. To investigate the relationship between blood pressure and testosterone and LH levels in healthy ageing men. Prospective study. University-affiliated Veterans Affairs Medical Centre. A total of 138 men age > or = 50 with no known or suspected organic cause of hypertension were enrolled in the study. Following an overnight fast, blood samples were drawn to measure total testosterone and LH concentrations. Blood pressure was also determined during this time using standard methods. The mean age of the men in the study was 65 +/- 5 years. Blood pressure values were similar to those obtained in a group of normotensive, younger men. Men in the study had significantly higher blood pressure than the normotensive younger group (P t h e r m s i n 2 \* d + 1 6 \* d \* \* 2 + 2 \* d - 2 \* d . 1 6 \* d \* \* 2 + 2 \* d C o l l e c t t h e r m s i n 2 5 0 \* p \* \* 2 - 9 3 \* p \* \* 2

### What's New In?

Spotify is launching a new feature called Playlists that allows you to group song by artist, album, or playlist. You can also merge playlists to create new ones. Playlists give you a convenient way to organize your music and make it easier to stream songs when you're not at home. For example, you can create a playlist containing songs from an artist you like, or add songs from different artists you're following to the same playlist. Getting Started Playlists are created inside the Spotify app using the same controls you use to create playlists with songs or albums. To create a playlist, tap on the Playlists tab at the top of the Spotify app, hit create new playlist, and then name your playlist. You can only create playlists in your home location, so you can't have global playlists or playlists at other countries yet. You can only select music that's in your library or if you have a subscription, so you can't add music from your friends, YouTube, or other services. To merge playlists, click on your playlists tab, tap the Merge playlists button, and then choose the playlists you want to merge. Spotify will give you an easy way to manage the songs and albums that will make up the new playlist. To create a playlist using a preset playlist, tap on the song you want to add and then tap the down arrow in the bottom-right corner. You can then create a new playlist using the number of songs, albums, or playlists you want to add. To add songs from your home location or another country, go to the Spotify website and log in with your existing account to download your music in a specific location. You can then sync the songs to your Spotify app. If you don't already have an account, you can create one at Spotify.com.#English strings go here LINGO\_PUNC\_SECTION\_MAIN\_PROFILE=Файлы учебных стихов и справочник LINGO\_PUNC\_SECTION\_OTHER=Другие LINGO\_PUNC\_SECTION\_BUILDER=Создатель LINGO\_PUNC
