How to Use Photoshop There are two ways to use Photoshop: as a standalone application and as a plug-in to Adobe programs like Illustrator. Using the standalone version is preferred over using a plug-in. This guide will focus on the standalone version of Photoshop and the basics for creating an image. Creating an Image In the following steps, you'll learn how to create an image to paint in with the Canvas tool. Make sure to keep your images in the.psd format. You can convert them to.png or.tiff if you wish. Open up Photoshop and click on the new document button. As a default, the canvas is set up in white. Click on the canvas to change the document's background to black. You can adjust the canvas's settings by clicking on the document's rightmost tab and finding the settings box at the top of the pop-up menu. Use the presets to find a canvas size that's more or less than the size of your monitor's resolution. You can scale the canvas during use later. Click OK. To set the canvas's settings you must use the document's rightmost tab. Use the Ruler at the top of the window to scale the canvas or to have the canvas size as a pixel ruler. Your default canvas size is set to 600 x 800 pixels. Open the Canvas Size drop-down list by clicking on the canvas rightmost tab. You can stretch the canvas by increasing or decreasing the canvas size in the bottom right corner of the screen. Change the Canvas Size and save the file when it is the proper size. You can change the size of the canvas by opening the settings box in the image's rightmost tab and adjusting the size as desired. While keeping the canvas about 1,200 x 1,200 pixels in size, click on the black canvas to create a new layer. Leave the background layer as white, but click the background layer to bring up the contextual menu (the black arrow). Choose New Layer and the layer will be automatically created. Click on the New Layer icon on the Layers palette's right side to create a new layer. Click on the Layer icon to bring up the contextual menu. Choose New Layer. Give the new layer a name such as Color Layer. You can name the layer, the canvas, the documents on the canvas, and the selection, for example.

Before: MILBURN, RYAN, and NORRIS, Circuit Judges. ORDER 1 This cause having come on to be heard upon the record, the briefs and the oral argument of the parties, and upon due consideration thereof, 2 The court finds that no prejudicial error intervened in the judgment and proceedings in the district court, and it is therefore ORDERED that said judgment be and it hereby is affirmed. Robert Stebbins House The Robert Stebbins House, also known as the Leavitt, Ridenbaugh and Stebbins House, is a historic First Period house located at 343 Spruce Street in North Kingstown, Rhode Island. Description and history The Robert Stebbins House was built in 1676 by John Cory of Orange, New York, and is one of a handful of surviving 1670s houses in the town of North Kingstown. It is a two-story, timber framed structure, resting on a stone foundation and measuring, with a gable roof and five-bay, clapboarded sides. The house has a central chimney stack on each floor, and the building corners are finished with stone quoining. The interior of the house has been extensively modernized, having been converted for use as a dormitory of the Rhode Island School of Design. The house was listed on the National Register of Historic Places on August 18, 1979.
