I am trying to create a Ruby web app which uses the Twilio API. I'm not sure how to send a text message through the API. I am able to successfully set up the account and connect a phone number. A: Twilio developer evangelist here. If you want to send a text message there is one thing you need to do. You need to register your mobile number with Twilio, it's required by our messaging system. You can do this under the Settings tab at [www.twilio.com/apps](http://www.twilio.com/apps). Once you have done that, it's just a case of building the number message. The endpoint I would suggest you look at is called 'Publish' and it has a lot of documentation around how to use it. You can play around with it by putting it into a new project here and just enter the URL for the project you want to send messages out of to.
