In one of my early days of using Photoshop, I purchased the beginner training manual _Adobe Photoshop 4.0: The Definitive Guide_ for $35. The manual was written by Andy Robinson and is absolutely a must-have. If you don't already have it, I strongly suggest you pick up this resource. It will walk you through all the tools and features of Photoshop, explaining the ins and outs of any subject. If you run into problems as you learn Photoshop, you can use the free online tutorials from Adobe to get help with everything from basic retouching to advanced image compositing. I especially recommend _Learning Lightroom._ Working with a tool like Photoshop is no small undertaking, and you need to make sure that you're going to be successful. The below outline is a list of tools to help you plan and prepare for your projects. Knowing what tools to use No matter how good you are with Photoshop, you have to know what you're doing. No one is born with a working knowledge of Photoshop and its vast array of features and tools. This section highlights some of the features of Photoshop and introduces you to some of the tools to help you stay on track. Choosing the right tool For the novice user, Photoshop can seem like a daunting task. It's not a small program with features that take months to learn. It has a huge collection of features that can be overwhelming. With a little training and a little practice, you can get started with Photoshop and keep on with your success. In many cases, you need to find the right tool for the job, and you need to use that tool effectively. You can use the right tool for the job every single time, but many times you'll have to switch to the right tool as you work on a project. Often, the right tool is a combination of tools, but sometimes you need to use only one tool to get a certain job done. This section looks at some of the tools that you use in Photoshop for creating and editing images. The features listed in the following sections all apply to the new Photoshop CS3 program. But even though CS3 is the newest version of Photoshop, its features are not new, and the techniques I show in the following sections still apply. Basic tools and the Standard Toolbox The steps for working with Photoshop are fairly easy. Your first stop is the work area and the Standard Toolbox. The Standard Toolbox can hold

Stock futures point lower on Friday after a mixed payroll report from the United States added to the cloud of gloom over the global economy and lackluster domestic economic data. May contracts of the Dow Jones industrial average were down 0.5 percent at 6,195.31 by 07:14 a.m. ET (1214 GMT). S&P 500 futures were off 0.3 percent, while Nasdaq futures were down 0.5 percent. Markets were also weighed by a mixed jobs report from the U.S. which showed signs of increased economic disarray after data earlier in the week revealed that Americans are sitting on record-low savings. According to a private payrolls report on Thursday, U.S. employers added only 100,000 new jobs, fewer than the expected 170,000 additions. Labor economist, Chris Rupkey, of Bank of America/Merrill Lynch, said U.S. employment is essentially unchanged in February, with companies cutting payrolls by about 100,000 jobs and average workweek is at just 3.8 hours. The report, however, showed a modest improvement in the service sector, the largest component of the U.S

Newcastle defender made to change room after touching pants of Conte Newcastle defender Steve Cookson reacts after the Premier League match between Newcastle United and Chelsea at St James' Park on January 3, 2017 in Newcastle upon Tyne, England. Published 17 January 2017 Newcastle centre-back Steve Cookson has been forced to change his location after touching his manager Antonio Conte's pants on the touchline. Cookson's wardrobe malfunction occurred after he patted Conte on the bottom in a warm-up session at St James' Park. The popular centre-back was criticised on social media in his home town of Accrington before he headed back to Newcastle, with fans dubbing it a 'wardrobe malfunction'. The 27-year-old will feature for Newcastle in Saturday's FA Cup fourth-round tie against Bury at St James' Park, and is unsure whether he can return to the bench next weekend. "It's quite embarrassing at the moment," he said. "For me and my family it's a bit of embarrassment. "I'm kind of getting a bit of stick at the minute. "I'll see the physio and the doctor and hopefully they can work something out. "It's just something that's happened that's made me feel a little bit sick and everything else. "It's not a funny matter, so it's more embarrassing than anything else. "It's football, I'm alive, it's not my first and I'm hoping it won't be my last. I'm taking each day as it comes. "For me it's embarrassing at the minute and they're just jokes as far as I can see. "Hopefully I'll be fit to play on Saturday. I'm going to have a look and see what happens." Cookson admits he is used to dealing with incidents on the pitch with Newcastle offering some stern words on the sidelines. "On the pitch, it's ridiculous," he said. "You try and block out everything and have fun but no. I'd say, 'it's all good, we're going to have fun on Saturday.' "I think it's frustrating for the other players. If you've just got the shirt on, you don't fancy it. "The first time, it's not easy, just the fact you've got the shirt on. "
