The following apps from Raindrop.io will help you to improve your content generation process and there are several good reasons to use them. The apps are easy to use and come with minimalist interfaces and brilliant design. The most useful one is probably 'Info', which is used to create a list of all your entries. On top of that, the whole operation is simply drag and drop. I'll begin with the one that is more of an enabler; 'SaveAs'. This is used to save the file you are working on, replacing the existing file. The basic function is quite similar to the SaveAs function of your default PDF or e-book file generating software. However, the app supports 'enhanced' functions. For example, the SaveAs function from your default software would ask you to enter the name, location, style and attributes you want to be applied. This app offers to do all
