Mipony Password Decryptor is a lightweight program that helps to recover login details for premium accounts stored inside Mipony. Mipony is a download manager that deals with files from various hosting services such as Mediafire, 4Shared, Bitshare, Megaupload and several others. Typically, premium accounts for such platforms can be stored inside Mipony in order to benefit from higher download speeds. Mipony Password Decryptor is able to decrypt the credentials that you've placed inside Mipony and is most helpful when you've forgotten the password to one of more accounts. The installation process is a little tricky though, as it may include third party components that are not necessary for the program's runtime, therefore it is recommended that you dismiss them. On the upside, it is very easy to use and requires very little efforts from the user. It comes wrapped up inside a simple and intuitive interface, from where you'll be able to start the recovery process right away. Since the program automatically detects the location of your Mipony installation, you will not be required to specify the path yourself. As soon as you press the 'Start Recovery' button, the application starts analyzing the data stored inside Mipony and reveals all of the username and passwords afferent to each identified account. What's more, it allows you to save the list of recovered credentials to an output file (in TXT, HTML or XML format) for later reference. All in all, Mipony Password Decryptor comes across as an easy solution to recovering logins for your premium accounts, spearing you the manual effort of doing so yourself.
